ABOUT ME

Full-Stack Developer with over 4 years of experience in building scalable web applications, backend APIs, and cloud-based solutions. Skilled in **Ruby on Rails, Java, Golang, JavaScript, Postgres**, and RESTful architecture. Skilled in problem-solving and debugging complex issues, with a solid background in writing, testing, and deploying clean and efficient code. Strong background in secure integrations, caching strategies, and performance optimization. Passionate about software development, with a strong desire to continuously learn, grow, and master modern technologies to become an expert developer.

TECHNICAL SKILLS

- **Programming Languages:** Java, Ruby, Golang, JavaScript, Python, C++
- **Frameworks & Tools:** Spring Boot, JDBC, Ruby on Rails, Active Record, Git, GitHub, Postman, Docker & Kubernetes (Basics)
- **Web Development:** RESTful APIs, Full Stack development, Object Oriented Programming, Test Driven Development (RSpec, Postman), HTML/CSS, JSON, MVC architecture, Design Patterns, Authentication
- **Databases:** PostgreSQL, SQL
- **Background Jobs & Caching:** Sidekiq, Redis, Memcached
- **Agile methodologies:** JIRA, Confluence, SCRUM
- Experience in building HTTP APIs and knowledge in Docker
- Good understanding of CI/CD deployment processes and experience in AWS
- **Testing & Debugging:** Rspec(Ruby), Junit(Java), IRB console, Debugging logs, AWS cloudwatch
- **Development Practices:** Clean Code, Agile methodologies, Version Control, Code reviews, Query Optimization, Git Workflow, Debugging, error handling and logging
- **Operating Systems:** Linux, Mac OS, Windows
- **Problem Solving:** LeetCode, HackerRank
- **Development Tools:** IntelliJ IDEA, Visual Studio Code, Eclipse

SOFT SKILLS

- Strong analytical and problem-solving skills
- Excellent communication and teamwork abilities
- Multicultural team collaboration experience
- Adaptability & Fast Learning
- Attention to Detail
- Time Management & Self-Motivation
- Open to Feedback & Always Willing to Learn
- Growth Mindset & Persistence
- Dedication & Commitment to Quality Work
- Hunger to Learn New Technologies & Improve Continuously

PROFESSIONAL EXPERIENCE

Software Developer

Sapaad Software Pte Ltd, Kerala 2020 - 2022

2020 - 2022

- Developed scalable web applications using **Ruby on Rails** (MVC) and **Golang** for backend services, integrating controllers, models, views, and routes.
- Built and maintained backend and frontend components using Ruby on Rails, JavaScript, jQuery, AJAX, and PostgreSQL.
- Designed and implemented **RESTful API endpoints** for order processing, payment handling, reporting, and business intelligence features.
- Worked for the development of microservices in **Go (Golang)** for performance-critical modules.
- Integrated payment gateways (**Stripe, Ipay88, Adyen, Geidea**) and implemented callbacks/webhooks for major food ordering platforms (Zomato, Talabat, Deliverect, Sindbad).
- Optimized complex SQL queries, reducing execution time by over **60%**, improving API response times significantly.
- Improved application scalability using caching strategies with **Redis** and **Memcached**.
- Designed RESTful APIs and background workers using Sidekiq for asynchronous processing and Redis for data caching.
- Implemented scalable pagination using kaminari or pagy, with lazy loading to improve UI performance.
- Applied OOP design patterns to improve maintainability and testability of business logic.
- Implemented OAuth2-based authentication for secure API access.
- Played a key role in technical planning and roadmap discussions, collaborating with product managers to define feature timelines and engineering feasibility.
- Added multi-language support via I18n and implemented secure authentication/authorization (OAuth, JWT, CSRF protection).
- Wrote unit and integration tests using **RSpec**, achieving 90%+ test coverage, conducted peer code reviews, and collaborated in Agile teams for continuous delivery.
- Utilized **AWS Lambda** and **CloudWatch** for serverless execution, monitoring, and logging.
- Worked in agile teams with Jira/Trello, participated in sprint planning, retrospectives, and daily standups.

Software Engineer
Kreatio Software Pte Ltd, Kerala

2018 - 2020

- Developed and maintained full-stack features in a large-scale content management platform using **Ruby on Rails, JavaScript, and PostgreSQL**.
- Implemented MVC-based modules with clean architecture, adhering to SOLID principles and modular design.
- Led multiple **data migrations**, including restructuring legacy schemas, writing reversible migrations, and ensuring zero downtime in production environments.
- Built interactive front-end components using **JavaScript** and **AJAX** for enhanced UX and dynamic content updates.
- Optimized ActiveRecord queries, reducing DB load and improving performance across critical reports.
- Worked with OAuth-based authentication and session management, ensuring secure access across admin and user portals.
- Developed and maintained background jobs with **Sidekiq** for email notifications, scheduled data syncing, and content publishing tasks.
- Led CMS modernization and migration initiatives, transforming legacy platforms into scalable, maintainable web applications using Ruby on Rails.
- Integrated **OAuth2, JWT** authentication strategies for internal and third-party APIs.
- Worked closely with QA teams and stakeholders to ensure comprehensive testing and successful rollout of each deployment phase.

- Maintained technical documentation including deployment procedures, and user guides, supporting long-term maintainability.
- Followed **Agile/Scrum** methodologies, participated in **sprint** planning, reviews, and retrospectives to ensure project alignment and timely delivery.

CONTINUOUS LEARNING & UPSKILLING

- Actively solving problems on LeetCode, HackerRank, focusing on Java and Ruby, algorithms, data structures, and time complexity.
- Actively mastering core concepts including OOP principles, exception handling, and stream APIs.
- Building RESTful APIs using Spring Boot, integrating with Spring Data JPA, Spring Security, and connecting to PostgreSQL databases.
- Developing simple microservices to gain hands-on experience with modular application design and API versioning.
- Rewriting solutions in multiple languages (Ruby, Go, Java) to deepen language proficiency and improve algorithmic thinking.
- Taking online courses, YouTube tutorials and active participation in LinkedIn developer communities, journals, and posts.

EDUCATION

- **Master's in Digital Transformation** - Fachhochschule Dortmund (2022 – present)
Working on research thesis: *Causes and patterns of delays in software projects across decades*
- **Master of Computer Applications** - College of Engineering Trivandrum, Kerala (2015 – 2018)
- **BSc Computer Science** - University Institute of Technology, Kerala (2012 – 2015)

LANGUAGE SKILLS

English: C1, Fluent

German: A2, Basic

CERTIFICATIONS

Java Foundations Professional Certificate: JetBrains / LinkedIn Learning - Sep 2025

Introduction to Maven: LinkedIn Learning - Sep 2025

Rails with Active Record and ActionPack: Coursera

Ruby on Rails: Introduction: Coursera
